Skive was in 2008  
recognised with the title  
'Energy Town'

**- sammen om gas til transport**

|                     |                  |
|---------------------|------------------|
| <b>M</b> = Minimize | <b>L</b> = Local |
| <b>O</b> = Optimize | <b>U</b> = Use   |
| <b>R</b> = Reduce   | <b>G</b> = Gas   |

***Facts:***

- Energy town Skive is lead partner in the project.
- Other partners are: 2 municipalities, Post Denmark, ESØ, West forbrænding', Institute of Technology.
- MOR project receives 2.8 million kr. from the Danish Transport Authority and shall be implemented in 2014-2015.

**Goal:**

- Is to gain experience with green gas for heavy transport.
- And to spread driving on gas and biogas in the municipalities.

**The Project has 2 steps:**

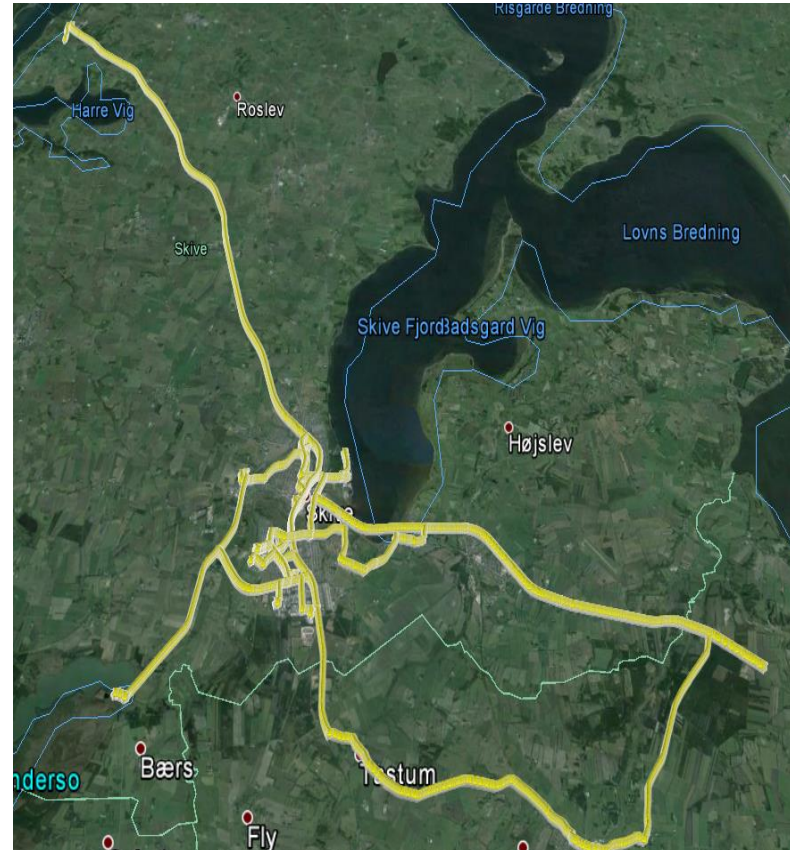

- Fleet analysis.
- Skive have to test CNG disability-buses and CNG trucks in Skive Municipality.

### ***First Fleet Analysis in Skive:***

- GPS data show that the fleet during peak times can be reduced by up to 5 buses.
- Few buses run longer than 50km away from the town and therefore has the potential to be replaced by gas buses.
- Several of the buses are over 10 years old. In order to reduce greenhouse emissions should they be replaced.

### ***The route of a disability-bus in a week***

### ***Plans for the gas future in Skive:***

- Gas Station has drawn attention to gas transport.
- In Skive Energy Strategy, we count on green gas for transport - especially for heavy transport
- The next step is to replace all the buses in the disabled department.
- After this project focused on other departments in the municipality:
  - The department of Park & Streets, Renovation, Taxi, etc.
